

## DEPARTMENT OF COMPUTER

### SCOPE OF STUDYING ENGLISH AT UG LEVEL

Basic computer knowledge creates many career opportunities in the modern world. Almost every organization depends on computers for communication, record keeping, data management, and online services. Students who learn computer basics can find jobs in offices, schools, banks, shops, hospitals, and companies. Careers such as computer operator, accountant, receptionist, data entry clerk, digital marketer, and customer support executive require computer skills. In addition, knowledge of computers helps people start freelancing, online businesses, and work-from-home jobs. As technology continues to grow, computer education has become essential for professional success and personal development.
